

The background of the entire page is a high-resolution image of a marble surface. It features a complex, organic pattern of swirling veins in shades of light beige, cream, and off-white, interspersed with darker, more dramatic veins of grey, taupe, and brown. The overall effect is one of natural elegance and luxury.

"In every single room, I like to include natural elements. You can't really lose mixing textures like velvets, mohairs... and marble. The Afrodit caught my eye-it's so good. Everybody already loves grey-it's a given, but even with this pink, it's still masculine and on-trend. Everything from TEMMER feels special."

"I always encourage my clients to use natural stone. I love the way it patinas and the veining. Marble sinks in bathrooms are really beautiful and unique; I'm especially drawn to a white marble with veining especially, like Calcatta or Carrara."

“The rich textures, the organic movement and the layered colours of TEMMER marble complement wood floors beautifully be it modern or traditional. By owning its own quarries, TEMMER allows me the chance to go deeper into any number of blocks for that perfect slab.”

“There is something very luxurious about the combination of misty-veined marble and rich wood grain. We selected TEMMER marble when I wanted to combine a soft natural backdrop with Francois & Co’s French Oak in chevron for a contemporary look.”

“Forbes + Masters prides itself on providing personal, custom, and trusted designs. With that in mind, we strive to use natural stone in beautiful applications that you may not immediately consider. For instance, we’ve designed custom dining tables with stone edges, backlit onyx backsplashes or fireplaces, even custom vanities made completely of stone. What we really love is creating a vessel for the natural beauty of whatever stone we’re working with to shine through. We use TEMMER as our Natural Stone source. Temmer has many varieties of the best products with extremely reasonable pricing because they own the quarries and factories.”

"I love to add natural stone to a fireplace feature wall to give it a more modern feel. I'm always aiming for drama, and designing the fireplace stone to tread up the wall to the ceiling renders that wow factor. The incredible stonework draws the eyes upward, making the average-sized room feel larger, airier and more open. It also beautifully adds texture to the space while making a focal point. I use TEMMER as my Natural Stone source. TEMMER has many varieties of the best products with extremely reasonable pricing because they own the quarries and factories."
